The AUTODOME 7000 IP is an easy to install, high-speed PTZ dome camera, in a field-proven housing suitable for indoor or outdoor installation, that delivers unmatched picture quality and network performance day and night. The camera provides complete network-based control of all dome functionality including pan/tilt/zoom operation, presets, tours and alarms as well as web-based configuration of all dome settings. It also provides direct network video streaming using H.264 compression / bandwidth throttling to efficiently manage bandwidth and storage requirements while delivering outstanding image quality.

**Functions**

**High-performance PTZ day/night camera**
The camera has a 1/4-in. CCD sensor, with 4CIF/D1 resolution and sensitivity to below 1.0 lux, and is available with a choice of 28x and the industry-leading 36x optical zoom lens. Both camera options have a full 12x digital zoom and provide D1 horizontal resolution for outstanding clarity and image detail. The camera also incorporates Wide Dynamic Range (WDR) technology that allows for the capture of clear images from both bright and dark areas in the same frame. WDR ensures that bright areas are not saturated and that dark areas are not too dark. Day/night capabilities and outstanding sensitivity make the camera an exceptional performer in all lighting conditions. In low light, the camera switches automatically from color to monochrome by removing the IR filter to boost the infrared illumination sensitivity, while maintaining superior image quality. For operation in the darkest conditions, the SensUp control feature automatically reduces the shutter speed to as little as one second. This increases sensitivity by more than 50 times.

**Progressive scan**
The camera is ideally suited for IP imaging applications. The progressive scan technology in the camera provides smooth and clear images when viewing images from the camera.

- Day/night IP camera with 28x or 36x optical zoom (12x digital zoom), Wide Dynamic Range (WDR), and Sodium Vapor White Balance mode that restores objects to their original color
- New Intelligent Tracking and alarm rules engine with on-board Intelligent Video Analytics (IVA)
- Enhanced system flexibility with dual recording options (iSCSI, SD card)
- Fully configurable quad streaming with individually configurable SD streams, based on Bosch’s new Common Product Platform (CPP4)
- Easy and intuitive installation with multiple pre-configured user modes that allow users to select the camera configuration that is ideal for their applications
**Sodium vapor lamp white balance**
The camera is an exceptional performer when capturing video under a sodium vapor lamp (a street lamp or tunnel lamp, for example). Images under these conditions may have a yellowish tint, which may make identification difficult. In the Sodium Vapor White Balance mode, the camera automatically compensates for the light from a sodium vapor lamp to restore objects to their original color.

**Virtual masking**
The camera offers Virtual Masking, which gives users flexibility to mask parts of the scene which should not be considered for flow analysis to trigger Intelligent Tracking. This allows users to mask background motion in the scene such as moving trees, pulsating lights, busy roads, etc.

**Intelligent Tracking**
The camera utilizes the built-in Intelligent Video Analytics (IVA) to follow an individual or an object continuously. Objects detected by IVA when the camera is in a stationary position activate the Intelligent Tracking feature, which controls the pan/tilt/zoom actions of the camera to keep the tracked object in the scene.

The new Intelligent Tracking is based on robust flow detection algorithms which can reliably track moving objects even under challenging scenes. The tracking and detection reliability can be enhanced further with virtual masking for scenes with a lot of background motion such as trees or other objects creating constant motion in the scene. The camera supports three modes for Intelligent Tracking:

- **Auto mode**: When configured in this mode, the camera actively analyzes the video to detect any moving object. If it detects movement, it begins to track the object. This mode is most useful for scenarios where normally no motion is expected.
- **One Click mode**: In this mode, users can click an object moving in the live video image to enable the camera to track the movement of the selected object. This mode is most useful for scenarios where normal scene activity is expected.
- **IVA-triggered mode**: In this mode, the camera continuously analyzes the scene for IVA alarms or IVA rule violations. If an IVA rule is violated, it triggers the advanced tracking feature of the camera to start following the object/person that triggered the alarm. This unique combination of robust IVA and Intelligent Tracking allows the camera to track moving objects of interest without getting distracted by other moving objects in the scene.

**Intelligence**
With built-in video content analysis, the AUTODOME reinforces the Intelligence-at-the-Edge concept where edge devices become increasingly intelligent.

The AUTODOME comes with Bosch’s Intelligent Video Analysis (IVA) built-in. IVA is state-of-the-art intelligent video analysis that reliably detects, and analyzes moving objects while suppressing unwanted alarms from spurious sources in the image. The IVA functionality built into the AUTODOME is able to detect idle and removed objects as well as loitering, multiple line crossing, and trajectories. IVA also supports BEV (Bird’s Eye View) People counting. Assisted Self Calibration and configurable detection filters improve reliability and reduce operator work load.

**AUTODOME 7000 PTZ drive and mechanism**
The AUTODOME 7000 supports 256 pre-positions and two styles of Guard Tours: Preset and Record/Playback. Users can configure the preset standard tour with as many as 256 sequential pre-positions, with a configurable dwell time between pre-positions. The AUTODOME Series also provides support for two recorded tours, which are recorded macros of an operator’s movements, including pan, tilt, and zoom activities, and can be played back with the click of a button.

Pan and tilt preset repeatability are accurate to within ±0.1 degrees to ensure that the correct scene is captured every time. The camera delivers variable pan/tilt speeds from a crawl speed of only 0.1 degrees per second to a full 400 degrees per second. The camera is capable of pan speeds of 400 degrees per second and tilt speeds of 300 degrees per second between prepositions. The camera provides a tilt angle 18 degrees above the horizon, and a pan range of up to 360 degrees continuous rotation. The AutoScaling (proportional zoom) and AutoPivot (automatically rotates and flips the camera) features ensure optimal control.

**Five (5) pre-programmed user modes**
Five pre-programmed but configurable user modes, optimized with the best settings for a variety of typical applications, make camera programming on-site easy and user-friendly. Users select from the menu the mode that best defines the environment in which the camera is installed:

- **Outdoor** – general day-to-night changes with sun highlights and street lighting
- **Indoor** – general day-to-night changes without sun highlights and street lighting
- **Low light** – optimized for sufficient details at low light
- **Motion** – monitoring traffic or fast moving objects; motion artifacts are minimized
- **Vibrant** – enhanced contrast color reproduction and sharpness

Users have the ability to customize these modes, if necessary, for the specific requirements of the site.
Superior privacy masking
The camera provides 24 individual, easy to configure privacy masks, with up to 8 displayed in the same scene. As the camera is zoomed, each mask changes size smoothly and quickly, ensuring that the covered object cannot be seen in most cases.

Comprehensive streaming capabilities on Bosch’s Common Product Platform (CPP4)
The camera has an advanced, efficient H.264 encoder (CPP4) embedded for DVD-quality streaming video and very efficient streaming and network capabilities. The new platform supports simultaneous streaming of individually configurable SD streams (H.264 and M-JPEG), and allows a choice of SD resolution.

Recording and storage management
A memory card (SD (Secure Digital), SDHC (Secure Digital High Capacity), or SDXC (Secure Digital eXtended Capacity)) can be used for local alarm recording or for scheduled local recording to improve the overall recording reliability. Recording management can be controlled by the Bosch Video Recording Manager (VRM), or the camera can use iSCSI targets directly without any recording software.

Advanced networking capabilities
The AUTODOME offers advanced capabilities so you can configure the camera to take advantage of the latest networking technology.

The AUTODOME offers Quality of Service (QoS) configuration options to ensure fast network response to PTZ data and images. Quality of Service (QoS) is the set of techniques to manage network resources. QoS manages the delay, delay variation (jitter), bandwidth, and packet loss parameters to guarantee the ability of a network to deliver predictable results. QoS identifies the type of data in a data packet and divides the packets into traffic classes that can be prioritized for forwarding.

The AUTODOME also supports the IPv6 internet-layer protocol for packet-switched internetworking across multiple IP networks. IPv6 uses 128-bit addresses (IPv4 uses 32-bit addressing), which allows for many more devices and users on the internet as well as extra flexibility in allocating addresses and efficiency for routing traffic.

Ease of installation and servicing
The camera has been designed for quick and easy installation; a key feature from Bosch CCTV products. All housings feature recessed screws and latches for increased tamper resistance.

AUTODOME in-ceiling housings provide IP54 protection. With an optional, impact-resistant, rugged polycarbonate bubble (sold separately), they are rated IK 8 (IEC 62262) to protect the camera from vandalism. The rugged bubble can withstand impacts equivalent to a 4.5 kg (10 lb) weight dropped from a height of 3 m (10 ft).

Indoor/outdoor pendant housings are rated to provide IP66 protection and offer an operating temperature range down to -40 °C (-40 °F). The indoor/outdoor pendant comes fully assembled with a sunshield and ready for wall or pipe applications with the proper mounting hardware (sold separately). In addition, the camera models with pendant housing come equipped with a low-impact, high-resolution acrylic bubble for enhanced image clarity. You can easily convert the outdoor pendant for indoor applications by removing the sunshield.

Bosch offers a full complement of hardware and accessories (sold separately) for wall, corner, mast, roof, pipe mount, and in-ceiling applications, which allow the camera to be adapted easily to individual site requirements.

Video management system support
The camera ships with Bosch Video Client (BVC), an easy-to-use software from Bosch that is suitable for midsize installations. For large enterprise systems, AUTODOME cameras can be used with Bosch Video Management System (BVMS), which allows enhanced video management and viewing capabilities.

In addition, the camera is supported/integrated into all of the leading third party video management systems.

ONVIF conformant
The AUTODOME Series conforms to the ONVIF Profile S specification allowing easy integration with the conformant devices and VMS.

For more information about ONVIF, visit www.onvif.org.

The camera conforms to the ONVIF (Open Network Video Interface Forum) specification which guarantees interoperability between network video products regardless of manufacturer. ONVIF conformant devices are able to exchange live video, audio, metadata and control information. They are automatically discovered and connected to network applications such as video management systems.

Fiber Optic Kit
Bosch offers the optional VG4-SFPSCKT, a unique media converter module for use with AUTODOME cameras. This media converter module is designed to accept a wide-range of 10/100 Mbps SFP modules for use with Multimode or Singlemode optical fiber with LC or SC connectors.

The media converter module along with the SFP module is user-installed directly into the camera’s power supply box to provide an integrated fiber optic solution.

Unsurpassed reliability
As with all Bosch products, the AUTODOME Series has been subjected to the industry’s most comprehensive and demanding battery of endurance tests such as HALT (highly accelerated life testing) to make sure it will hold up through years of use. And of course, it comes with Bosch’s industry-leading 3-year warranty.
Access security

Various security levels are available for accessing the network, the camera, and the data channels. As well as password protection with three levels, 802.1x authentication using a RADIUS (Remote Authentication Dial In User Service) server is supported. To secure Web browser access, use HTTPS with a SSL certificate stored in the camera. For total data protection, the video and audio communication channels can be independently AES encrypted with 128-bit keys by installing the optional encryption site license.

Easy upgrade

Remotely upgrade the camera whenever new firmware becomes available. This ensures up-to-date products, thus protecting investment with little effort.

### Software Control

- **Camera Setup/Control**: Via web browser (such as Internet Explorer version 7.0 or later), Bosch Configuration Manager, Bosch Video Management System (BVMS), or Bosch Video Client (BVC)
- **Software Update**: Network firmware upload

### Network

- **Video compression**: H.264 (ISO/IEC 14496-10), M-JPEG

### Software Update

- Network firmware upload

### Fiber Optic Kit

**VG4-SFPSCKT**

- **Description**: Fiber Optic Ethernet Media Converter kit. Requires a small form-factor pluggable (SFP) module (sold separately).

### Memory Card Slot

- User-supplied SD/SDHC/SDXC memory card (maximum 2TB – SDXC)

### Recording

- Continuous recording of video and audio

### Fiber Optic Kit

**VG4-SFPSCKT**

- **Description**: Fiber Optic Ethernet Media Converter kit. Requires a small form-factor pluggable (SFP) module (sold separately).

### Data Interface

- Ethernet

### Data Rate

- 10/100 Mbps

### Compatible Receiver

- CNFE2MC
Installation

Installed inside a VG4-A-PA0, VG4-A-PA1, VG4-A-PA2, VG4-A-PSU1, or a VG4-A-PSU2 power supply box with supplied mounting hardware.

5. Kit available separately and must be installed inside the AUTODOME power supply box.

SFP Modules

Description

Interchangeable modules available for use with MMF or SMF optical fiber.

Data Interface

Ethernet

Data Rate

10/100 Mbps

IEEE 802.3 Compliant

Mechanical

Dimensions (LxWxH)

- SFP-2 and SFP-3: 55.5 x 13.5 x 8.5 mm (2.2 x 0.5 x 0.3 in.)
- SFP-25, SFP-26: 63.8 x 13.5 x 8.5 mm (2.5 x 0.5 x 0.3 in.)

Weight (all SFP modules): 0.23 kg (.05 lb)

Fiber Compatibility

- Optical Fiber Compatibility, MMF: 50/125 μm MMF. For 50/125 μm fiber, subtract 4 dB from the specified optical budget value. Must meet or exceed fiber standard ITU-T.G.651.
- Optical Fiber Compatibility, SMF: 8–10/125 μm SMF. Must meet or exceed fiber standard ITU-T.G.652.
- Optical Distance Specifications: Specified transmission distances are limited to the optical loss of the fiber and any additional loss introduced by connectors, splices, and patch panels. The modules are designed to operate over the entire optical loss budget range, so they do not require a minimum loss in order to operate.

Miscellaneous

Sectors/Titling

16 independent sectors with a 20-character title/sector

Masking

24 individually configurable privacy masks

Pre-positions

256, each with a 20-character title

Guard Tours

Two (2) types of tours:

- Recorded tours – two (2)
- Preset tour – one (1), consisting of up to 256 scenes, consecutively

Supported Languages

English, Chinese, Dutch, French, German, Italian, Japanese, Polish, Portuguese, and Spanish

User Connections

Power, Camera

- RJ-45 10/100 Base-TX Ethernet (High Power-over-Ethernet (High PoE)) or PoE+ (IEEE 802.3at, class 4 standard) 21-30 VAC, 50/60 Hz

Power, Heater

- RJ-45 10/100 Base-TX Ethernet (High Power-over-Ethernet (High PoE)) 21-30 VAC, 50/60 Hz

Video and Control

RJ-45 10/100 Base-TX Ethernet

Alarm Inputs (7)

2 supervised; 5 non-supervised Programmable for “normally open” or “normally closed”

Alarm Outputs (4)

1 dry contact relay; 3 open collector/ transistor outputs 32 VDC @ 150 ma max.

Audio

1 x mono line in, 1 x mono line out
- Signal line in: 12 kΩOhm typical, 1 Vrms max
- Signal line out: 1 Vrms at 1.5 kΩhm, typical

Environmental

In-Ceiling

IP54, Plenum rated

Pendant

NEMA 4X for:
- Access to Hazardous parts
- Ingress of solid foreign objects (falling dirt, circulating dust, settling dust)
- Ingress of water (dripping and light splashing, hosedown and splashing)
- Corrosive agents

Operating Temp.

-10°C to 40°C (14°F to 104°F)

-40°C to 55°C (-40°F to 131°F)

Storage Temp.

-40°C to 60°C (-40°F to 140°F)

Humidity

0% to 90% relative, non-condensing

0% to 100% relative, condensing

6. Without heater connected in power supply box for indoor applications.

Construction

Dimensions

See dimensional drawings

Weight

- In-ceiling: 2.58 kg (5.69 lb)
**Indoor/Outdoor Pendant**

3.06 kg (6.75 lb)

**Bubble Size**

153.1 mm diameter (6.03 in.)

**Construction Material**

- **Housing**
  - In-ceiling: Magnesium
  - Pendant: Cast aluminum

- **Bubble**
  - In-ceiling: High-resolution acrylic, rugged polycarbonate, or HD high-resolution acrylic
  - Pendant: High-resolution acrylic or rugged polycarbonate

  - Clear rugged polycarbonate
  - Tinted rugged polycarbonate

**Pendant Arm Mounts**

- Wall Arm (No Transformer)
- Wall Arm (120/230 VAC Transformer)
- Pendant Arm with Wiring
- Mounting plate for VGA-PEND-ARM
- Trim skirt for VG4 Series Power Supplies

**Optional Mounting Plates for Arm Mounts**

- Corner Mounting Plate
- Mast (Pole) Mounting Plate
- Pendant Pipe Mounts
  - Pipe Mount Cap

**Pendant Roof Mounts**

- Roof (Parapet) Mount *(VG4-A-9543 Pipe Mount Cap required. Available separately.)*

**Optional Mounting Plates for Roof Mounts**

- Flat Roof Adapter for Parapet Mount
- Bracket for suspended or drop ceilings

**In-ceiling Support Kits**

- Bracket for suspended or drop ceilings

**Power Supplies**

- High PoE Midspan 60W, single port, AC in
- Outdoor Power Supply Box, no transformer
- Outdoor Power Supply Box (120/230 VAC Transformer)

**Fiber Optic Kit**

**Dimensional Drawings**

**AUTODOME 7000 – Slot for SD card**

1 Slot for SD card
AUTODOME 7000 Dimensions – Pendant, Pipe
