

DICENTIS Dual Use at Seat

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Facilitates dual-use functionality in a DICENTIS wireless Device and a DICENTIS Conference device
- ▶ Enables the participant's name to be correctly displayed when the DICENTIS devices are used by two participants

The functionality of the DICENTIS Discussion device, Discussion device with language selector, Discussion device with voting and DICENTIS Wireless Device can be extended by the use of licenses. The DICENTIS Dual Use at Seat license allows two participants to use the same device and still have their names correctly displayed in the speakers list or with the camera image. It even allows one participant to speak while the other participant is in the waiting-to-speak list. The DICENTIS Dual Use at Seat license can be extended with identification and/or voting to make the DICENTIS Discussion device with touchscreen and the DICENTIS Wireless Extended Device even more versatile. The license is supplied as an activation code and is enabled in the same way as the other activation codes in the DICENTIS System.

Functions

Operation

- Each of the participants can activate and deactivate the microphone by using their own dedicated microphone request button.
- To ensure ease of use, the microphone request button functions the same way as a discussion device configured for single-use.

Dual-use with identification

- When the DCNM-DE, DICENTIS Discussion device with touchscreen, or DCNM-WDE, DICENTIS wireless Device Extended, is configured for dual-use, and the DICENTIS Identification at Seat license DCNM-LSID is activated, each participant can conveniently log on to the discussion system by using their Near Field Communication (NFC) tag.
- When logging on, participants can decide if they want to sit on the left or right side of the Discussion device or wireless Device.
- Participants can log off at any time, by pressing their own logoff button.
- Two copies of the DCNM-LSID license are required for each dual-use wireless Device that requires Identification at Seat.

Dual-use with voting

- When the DCNM-DE, DICENTIS Discussion device with touchscreen, or DCNM-WDE, DICENTIS wireless Device Extended, is configured for dual-use, and the DICENTIS Voting at Seat license DCNM-LSVT is activated, each participant can vote at the same time by using their own voting buttons.
- Two copies of the DCNM-LSVT license are required for each dual-use DCNM-DE DICENTIS Discussion device with touchscreen and DCNM-WDE DICENTIS wireless Device Extended that requires Voting at Seat.
