

1 Open Source License Statements

This software contains the FIPS-197 compliant AES implementation from PolarSSL licensed as follows:

Note: This license file was taken from PolarSSL-0.10.1 and modified by Texas Instruments with permission by Paul Bakker of PolarSSL (<http://www.polarssl.com>). The only change is to allow redistributions in embedded binaries to only have a "published" copyright and license notice via a website. This is because embedded applications do not generally have copyright displays and often do not have published documentation (as they are part of a larger system).

Based on XySSL: Copyright (c) 2006-2008, Christophe Devine.
