BOSCH
Invented for life

- ▶ Automatically shows current speaker on display of multimedia devices
- ▶ Interface for Onvif Profile-S compliant IP (including Panasonic and Sony cameras)
- ▶ Automatically discovers Onvif Profile-S cameras
- ▶ Controls HD-SDI video switchers

The DICENTIS Camera Control software module makes it possible to interface the DICENTIS Conference System and the DICENTIS Wireless System with IP cameras. It selects the activation of fixed or pre-positioned cameras, so that the current active speaker can be displayed during a meeting.

Functions

When a participant's microphone is activated, the camera assigned to that position is activated. When none of the microphones is activated, an overview camera is automatically activated instead. The video image is shown on the touch-screen of the DICENTIS Multimedia device, but can also be displayed on the DICENTIS Meeting Application or on hall displays together with information about the current speaker. Configuration is easy because all Onvif Profile-S compliant cameras are automatically discovered. In the DICENTIS Conference System and DICENTIS Wireless System, the DICENTIS Camera Control software module offers:

- Control of Onvif Profile-S compatible cameras with username and password.
- Panasonic camera support via its IP protocol:
 - AW-HE40, AW-HE50, AW-HE60, AW-HE120, AW-HE130, AW-UE70.
- Sony camera support via its IP protocol:
 - SRG-300SE and SRG 360SHE.

- Control of the TvOne CORIOmatrix and the Kramer MV-6 video switches.
- The enabling of HD-SDI video switching, so that HD-SDI video signals can be automatically switched and displayed with low-latency on one or more hall displays.

The following is also supported for the DICENTIS Conference System:

- TvOne C2-2355A in combination with TvOne S2-108HD.

Parts included

Quantity	Component
1	E-mail with license activation information.

Technical specifications

DICENTIS Conference System:	• DCNM-LSYS license
DICENTIS Wireless System:	• DCNM-WAP

Ordering information

DCNM-LCC Camera control license

DICENTIS Camera Control enables the use of cameras in the DICENTIS Conference system and DICENTIS Wireless system. DICENTIS Conference systems require system license DCNM LSYS.
Order number **DCNM-LCC**
