1	Using a BVMS demo license	3
2	Activating the demo license	4
2.1	Retrieving the Computer Signature	4

1 Using a BVMS demo license

Trying out the BVMS is easy! Download the BVMS from the online catalogue and use the [quick installation guide](#) to set-up the system. The demo license includes 40 video channels, 10 workstations, 1 DVR, 8 keyboards, 2 enterprise subsystems, 1 intrusion panel and 5 unmanaged sites.

Version	Download	License Package
BVMS 8.0	BVMS 8.0 installation	Demo license package
BVMS 9.0	BVMS 9.0 installation	Demo license package

2 Activating the demo license

Browse to <http://activation.boschsecurity.com> and create a new account. Fill in the required details on the form.

▲ Top of page

Click the "Submit" button next to the BVMS license package to generate a license key.

2.1 Retrieving the Computer Signature

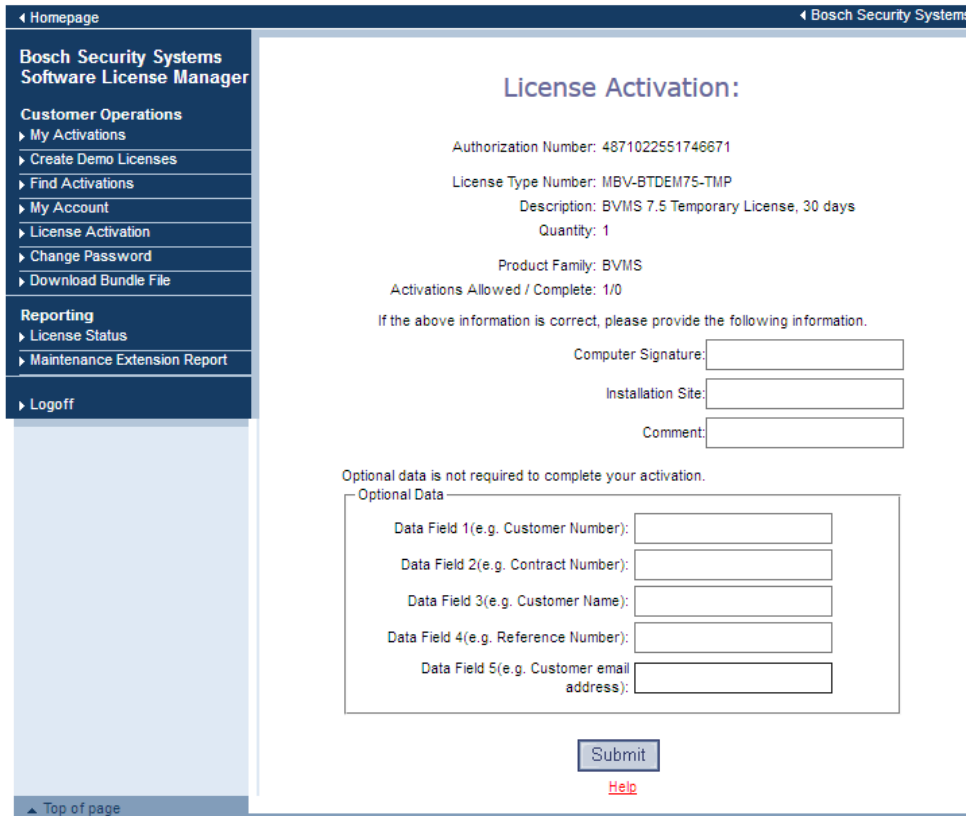

Download the Demo license package and extract the zip file to a convenient location.

Start the BVMS Configuration Client. During the first log on the license manager window will open automatically. Open the "Tools" menu and click "License Manager", from the BVMS Configuration Client, to start it manually. Click the "Add New

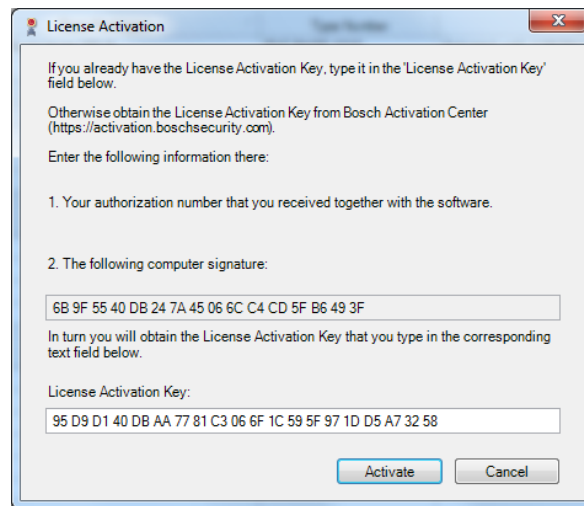

Package" button in the license manager and add the "License_PackageBTDemo_x.x.lif" package. A new base package is added to the license manager. Select the checkbox in the yellow column and click "Activate".

Copy the computer signature to the license activation window, shown below, fill in the necessary details, and click "Submit".

The license activation information appears, including an "Authorization Number". Copy the authorization number and paste it into the License Activation window, as shown below.

Click "Active". Your system is now ready to be used.
