Topic **Installation of BIS from downloaded ZIP files**

Description Steps to install BIS from ZIP files downloaded from the online product catalogue.

1. Download all the ZIP files marked “mandatory”. These are sufficient for an installation of BIS in the English language.
2. If you require a language other than English, download the optional ZIP file for the desired language.
3. Unpack all the zip files in the same folder, hereafter called ROOT.
4. You should obtain the folder hierarchy illustrated, whereby not all language folders need be present.
5. With administrator rights, execute **setup.exe** in the ROOT folder.
6. Follow the instructions given by the installation program.
